Dear BEAR Summit 2026 Innovators,

Assalamualaikum and Greetings from Silicon River!

Congratulations! We are delighted to inform you that your innovation has been finally selected for exhibition at the Bangladesh Innovates Pavilion at CES 2027, to be held in Las Vegas, USA, January 6–9, 2027.

Your selection recognizes the innovation, technical potential, and entrepreneurial promise of your work. Our ambition is to introduce Bangladesh's emerging technologies to global customers, investors, industry leaders, and potential collaborators, and ultimately help transform promising innovations into globally competitive technology ventures.

CES 2027: Participation and Logistics

We strongly encourage at least one member of your team to attend CES in person. Your presence will significantly strengthen the demonstration and create opportunities for direct engagement with visitors and potential partners.

Please note the following arrangements:

1. **Exhibition:** Silicon River will provide exhibition space within the Bangladesh Innovates Pavilion and coordinate the overall showcase.
2. **Sponsorship:** We will provide official letters of support that your team can use to approach universities, companies, organizations, and potential sponsors for financial assistance.
3. **Travel:** Each team will be responsible for obtaining US visas and independently arranging and financing airfare, accommodation, transportation, and other travel-related expenses.
4. **Demonstrations:** Teams will be responsible for preparing their functional prototypes, software demonstrations, videos, and necessary presentation materials, including arrangements for transporting physical exhibits.
5. **Remote participation:** If your team cannot travel to Las Vegas, your innovation will still be showcased at the pavilion. We will facilitate remote interactions with visitors through Zoom, Facebook, or other suitable platforms.
6. **Social Media Promotion:** We encourage all selected teams to begin sharing the news of their selection for CES 2027 through their personal, team, and institutional social media accounts, including Facebook and LinkedIn. Please use the attached official Bangladesh Innovates at CES 2027 information card in your announcements to ensure consistent branding and amplify our collective visibility. We encourage you to tag Silicon River and acknowledge your institution when sharing.

Mandatory Virtual Coordination Meeting: Friday, October 30, 2026

We invite all selected teams to join our first CES 2027 coordination meeting.

Date: Friday, October 30, 2026
Time: 6:30 PM Bangladesh Time
Platform: Zoom
Meeting Link: https://purdue-edu.zoom.us/j/92190902949?pwd=aFhgoUTDvRbxy5lRQt1BUQm1q5Q8e6.1 [Meeting ID: 921 9090 2949, Passcode: 337145]

We will discuss exhibition preparations, prototype readiness, sponsorship letters, travel arrangements, and the next steps toward CES 2027. At least one representative from each team is expected to attend.

Silicon River NEXT 2026: November 11 at AUST

We are also pleased to invite your team to **Silicon River NEXT 2026**, taking place at Ahsanullah University of Science and Technology (AUST), Dhaka.

Date: Wednesday, November 11, 2026
Time: 10:00 AM Bangladesh Time
Venue: AUST, Dhaka

All selected teams are required to bring their working prototype or demonstration to this event, unless the physical system weighs more than 5 kg. Teams with heavier systems should arrange an appropriate video or interactive demonstration instead. Software and AI teams should be prepared to demonstrate their applications live.

This event will provide an important opportunity to review your innovations, assess demonstration readiness, and coordinate preparations for their international showcase. Your invitation card is attached too. **Due to space limitation, we invite only two members from each group.**

We recognize the challenges associated with preparing for CES on a short timeline. However, we believe that with determination, preparation, and collective effort, we can make Bangladesh's presence at CES 2027 both meaningful and impactful.

Our objective is not simply to take Bangladeshi innovations to CES. It is to introduce the world to the next generation of Bangladeshi technology companies.

Congratulations once again. We look forward to meeting you virtually on October 30 and in person at AUST on November 11.

Warm regards,

Muhammad Mustafa Hussain
Chief Architect, Silicon River and BEAR for Bangladesh
Professor, Electrical and Computer Engineering
Purdue University
Fellow, IEEE, APS and IoP
