Dear Team,

Congratulations!

We are delighted to inform you that your project has been selected as one of the **Top 10 Featured Innovations** to be showcased in the **CES Pavilion** at the **National Semiconductor Symposium & BEAR Summit 2026**, to be held on **25–26 July 2026** at the **Novo Theatre, Dhaka, Bangladesh**.

This recognition reflects the exceptional innovation, technical excellence, originality, and long-term potential demonstrated by your project during our multi-stage evaluation process involving independent academic and industry reviewers.

On behalf of the Bangladesh Semiconductor Industry Association (BSIA) and the BEAR Summit Organizing Committee, we sincerely congratulate you and your team on this remarkable achievement.

What is the CES Pavilion?

The CES Pavilion is a special showcase within BEAR Summit 2026 highlighting ten innovations that demonstrate outstanding potential for global impact.

The Pavilion has been created to:

- Inspire the next generation of innovators
- Highlight Bangladesh's emerging deep-tech ecosystem
- Introduce promising technologies to government, industry, investors, academia, and international guests
- Encourage teams to think beyond prototypes and toward globally competitive products and companies

Being selected for the CES Pavilion is an important milestone and recognition of your team's hard work and vision.

An Important Clarification

We would like to emphasize that:

Selection for the CES Pavilion at BEAR Summit 2026 does NOT automatically qualify a project for CES 2027 in Las Vegas.

The CES Pavilion is intended to recognize projects with strong international promise and to help prepare them for future global opportunities.

The journey toward CES 2027 is an ongoing process.

Over the coming months, every project will continue to be evaluated based on:

- Technical progress
- Prototype maturity
- Product refinement
- User validation
- Commercialization strategy
- Global competitiveness
- Demonstration quality
- Team execution and commitment

The final projects that will officially represent Bangladesh at **CES 2027** are expected to be announced later this year following continued mentoring and evaluation.

We therefore encourage every team to remain patient and continue improving. There is still significant work ahead, and the strongest projects will be those that demonstrate continuous progress over the coming months.

Preparing for BEAR Summit

As one of the CES Pavilion projects, we encourage your team to prepare an exceptional exhibition experience.

Please continue improving:

- Technical performance
- Prototype reliability
- Demonstration quality
- User experience
- Visual presentation
- Storytelling
- Market opportunity
- Global positioning

Visitors should immediately understand:

- What problem you are solving
- Why your solution is different
- Why the world should care
- Why your technology deserves global attention

Share the Good News!

This achievement is a proud moment for your team, your institution, and Bangladesh's growing innovation ecosystem.

We encourage you to celebrate and share this announcement widely through your social media platforms.

When posting, please:

- Tag our official Facebook page: **BEAR Summit 2026**
- Mention your university or institution
- Share photos or videos of your prototype and team
- Help inspire other students and innovators across Bangladesh

Together, we can showcase Bangladesh's innovation potential to the world.

Keep Building

Selection for the CES Pavilion is not the finish line.

It is an invitation to aim even higher.

Our vision is not simply to exhibit projects.

Our vision is to help create globally competitive technologies, successful startups, and future industries that proudly carry the name of Bangladesh around the world.

As we move toward CES 2027, we encourage every team to continue learning, refining, validating, and strengthening your innovation.

Remember:

Dream Big. Build Boldly. Stay Humble. Keep Improving.

Congratulations once again on this outstanding accomplishment.

We look forward to welcoming you to the **CES Pavilion at BEAR Summit 2026** and following your journey in the months ahead.

With best wishes,

BEAR Summit 2026 Organizing Committee
Bangladesh Semiconductor Industry Association (BSIA)
National Semiconductor Symposium 2026
Silicon River Initiative

Bangladesh Innovates. BEAR for the World.
Dream • Innovate • Build • Lead
